Jl. Mampang Prapatan II Rt 009 Rw 003, Mampang Prapatan, Kec. Mampang Prapatan, Jakarta Selatan.

An enthusiastic Informatics undergraduate student driven by a strong passion for continuous learning and exploring new technologies. As an introspective and focused individual, I naturally thrive in thoughtful analysis while successfully adapting to collaborate effectively and professionally within fast-paced teams. Combines foundational software engineering skills with proven organizational experience, always eager to transform every challenge into a valuable learning opportunity.

Education Level

SMKN 6 Jakarta - Jakarta Selatan	Jul 2022 - May 2025
<i>Senior High School, Rekayasa Perangkat Lunak</i>	
- Focused on core Software Engineering principles, gaining hands-on experience in desktop, web, and foundational database technologies. - Developed desktop applications using C++ and C# for Windows development, establishing a strong understanding of object-oriented programming (OOP). - Built server-side web applications using native PHP and implemented foundational relational database management systems (RDBMS). - Acquired essential knowledge in basic UI/UX design concepts, data modeling, and Entity-Relationship Diagrams (ERD).	

Work Experiences

PLN Icon Plus - Jakarta, Indonesia	Jul 2024 - Dec 2024
<i>Internship</i>	
A subsidiary of PT PLN (Persero) that provides cutting-edge information and communication technology (ICT) solutions, focusing on network infrastructure, digital transformation, and green energy technology across Indonesia. - Performed routine operating system installations and maintenance on corporate laptops to ensure technical readiness and compliance. - Developed a micro-scale internal networking platform concept inspired by LinkedIn features to enhance cross-divisional connection among senior management. - Designed UI/UX wireframes, created Entity-Relationship Diagrams (ERD), and built web application features using the Laravel framework. - Acquired practical hands-on experience in modern frontend and mobile development technologies, focusing on UI/UX design principles and React Native.	

Organisational Experience

Council Student - SMKN 6 Jakarta	Sep 2023 - Dec 2024
<i>Leader at Islamic Department</i>	
The student council body of SMKN 6 Jakarta, responsible for managing student activities, fostering leadership, and executing various large-scale school events and cross-functional programs. - Led the Islamic Department within the Student Council, managing routine religious programs and fostering cross-functional collaboration with related school extracurricular groups. - Served as Vice Chairperson for major school events, overseeing project scheduling, task delegation, and ensuring smooth coordination across all working divisions. - Contributed actively across diverse event committees, including roles as Event Coordinator (managing program timelines) and Logistics Specialist (handling equipment procurement and setup). - Demonstrated high professional adaptability and reliability within dynamic team structures to execute successful school event productions.	

Skills, Achievements & Other Experience
